# Abrasive Wheel Training

**BAF Accredited TTSABW6:** Hand Held Grinder, Angle grinder etc. Bench & Pedestal Grinder

# Course: TTSABW6

## BAF Accredited Abrasive Wheel Training:

All of our abrasive wheel training courses are accredited by the British Abrasives Federation.

This means that our course content has been checked by industry experts to ensure that what we are doing is accurate, up to date and fully compliant with Health & Safety Law.

Our instructors are machine operators they understand all aspects of cutting and grinding and also understand why things can go wrong.

We have over 10 different versions of our abrasive wheel training course to ensure that your training course covers the machine types that you use.

## Course Requirements:

This course can be conducted on any site that has suitable facilities (power and seating), this course is for 1 to 12 trainees but we can train up to a maximum of 15 trainees.

When conducting the practical element of the training we use the customer's equipment. It is the customers responsibility to ensure the equipment is suitable for its intended use, that is properly maintained and that all trainees are in possession of the correct PPE for the type of machine that they will be using.

On completion of the course you will receive a nationally recognised BAF accredited certificate and will have the attendees details entered on to the BAF national database.
